A5 Mobile Development

Software vendor, outsource, out-stuff

*Kharkiv, Ukraine, <http://a5.ua>*

Company “A5 Mobile Development”, mobile-oriented software vendor from Ukraine, would like to offer services in software development, outsourcing and out-stuffing.

- We are oriented on subcontracts and direct contracts with customers from Europe and USA and have 7-year long experience as outsourcing company. All our developers are at least 3 years in software development and have at least Master degree in Mathematics, Automation or IT Science. Our advantage is also wide range of “side-skills” of our developers: many of them have experience not only in development for mobile platforms but as well in Enterprise-level projects development with J2EE, PHP, RoR, Flex etc.
- All developers have proper English, as a rule we have project documentation in English, second most commonly language used is German.
- We offer services in full-circle project development (from your idea to tech notes and wireframes, than to prototype and finally to ready-for-market product) as well as outsourcing project stages and out-stuffing our development resources to remotely enforce your team. Our office located in Kharkov, Ukraine.

A5 Mobile Development

Software vendor, outsource, out-stuff

- We usually work following SCRUM methodology and use traditional for this field software set.
- Collaboration with us will be for you much more profitable then hiring developer as a regular employee or using services of registered in USA/EU freelancer due to lower taxes rates in Ukraine, and of course more profitable then hiring on-site employee with social security etc.. Beside this it will reduce risk of project deadlines fail due to developer sick-list or vocation: in case of force-major we will replace the developer with another suitable highly skilled professional transparent for you.
- Our experience allows to be sure that we will overcame all possible difficulties caused buy remote personal management and language barriers.

Company development segmented into three branches: Android Development, iOS/MacOS Development and J2EE Development.

- Android Development department uses Java for native Android development, some experiments done with Kotlin. Strong skills
